

TABLES GIVING ALL THE SCOTTISH MOUNTAINS EXCEEDING 3,000 FEET IN HEIGHT.

INTRODUCTION.

IN the Preface to the first number of the *Journal* it was correctly stated that there are more than three hundred mountains in Scotland whose height exceeds 3,000 feet. The exact number cannot be determined, owing to the impossibility of deciding what should be considered distinct mountains. For instance, Braeriach and Cairn Toul are always counted as separate mountains, and so are the various peaks of the Cuillins, in Skye; and yet these are no more distinct than are Sron Isean or Stob Daimh from the two main peaks of Ben Cruachan, one and a half and two miles to the west. The names of these peaks, though, are not even given on the Ordnance sheet, but are generally included under the name Ben Cruachan.

In the following tables, therefore, it has been thought best to include every "*top*" which attains an elevation of 3,000 feet; while in the first column only such as may fairly be reckoned distinct mountains are numbered.

From the tables it will be seen that there are in all 538 tops exceeding 3,000 feet in height. The whole of these are situated in the Highlands, and all—with the exception of Ben More, in Mull, and the Cuillins and Blaven (Blath Bheinn), in Skye—are on the mainland. The southernmost is Ben Lomond, in Stirlingshire; the northernmost is Ben Hope, in the north-west of Sutherlandshire; the easternmost is Mount Keen, above Loch Lee, between Forfarshire and Aberdeenshire; and the westernmost is Sgùrr na Banachdich, in the Cuillins, Skye; while on the mainland Ladhar Bheinn, in Knoidart, Inverness-shire, is the westernmost.

In Stirlingshire...	there is	1
„ Dumbartonshire	there are	3
„ Argyllshire (including one in Mull)	„	56

In the tables the following natural grouping has been adopted, the numbers in each division being as under :—

SECTION 1.—South of the Callander and Oban Railway ... 26

SECTION 2.—In the district enclosed by a line drawn by the the railways from Killin Junction to Dunblane, Dunblane to Perth, and Perth to Ballinluig and Aberfeldy, and thence through Loch Tay to Killin Junction ... 3

SECTION 3.—In the district enclosed by a line drawn from Tyndrum to Killin, thence to Ballinluig and Pitlochry, and by Lochs Tummel, Rannoch, and Laidon to Kingshouse, and back thence by road to Tyndrum ... 45

SECTION 4.—In the district enclosed by a line drawn from Tyndrum to Kingshouse, down Glencoe, by Loch Linnhe to Oban, and back to Tyndrum ... 45

SECTION 5.—In the district enclosed by a line drawn from Ballachulish through Glencoe to Kingshouse, and by Lochs Laidon, Rannoch, and Tummel to Pitlochry, thence up the Highland line to Newtonmore, and thence by Loch Laggan, Glen Spean, Glen Lochy, and Lower Loch Eil to Ballachulish ... 74

Carry forward ... 167 26

	Brought forward	...	167	26
SECTION 6.—In the district enclosed by a line drawn from Newtonmore by Loch Laggan and Glen Spean to Loch Lochy, up the Caledonian Canal to Inverness, thence by coach road south to Boat of Garten, and by the railway to Newtonmore				
...	26
Therefore the railways from Oban to Dunblane, Dun- blane to Perth, Perth to Boat of Garten, the coach road thence to Inverness, and the Caledonian Canal to Oban, enclose				
...	— 193
West of the Caledonian Canal, and south of the road from Fort-William to Arisaig, except Ben More in Mull, no mountain exceeds 3,000 feet.				
SECTION 7.—In the district enclosed by a line drawn from Fort-William to Arisaig, up the Sound of Sleat, Kyle Rhea, Lochs Alsh and Duich, by Glens Sheil, Clunie, and Moriston, to the Caledonian Canal, and thence to Fort- William				
...	39
SECTION 8.—In the district enclosed by a line drawn from Loch Alsh to Glen Moriston as above, by the Caledonian Canal to Drumnadrochit, thence by Glens Urquhart, Cannich, and Elchaig to Loch Alsh				
...	53
SECTION 9.—In the district enclosed by a line drawn from Loch Alsh by Glens Elchaig, Cannich, and Urquhart to Drumnadrochit, by the Canal to Inverness, and by the railway thence <i>via</i> Dingwall to Strome Ferry, and back to Loch Alsh				
...	26
Therefore south of the Inverness, Dingwall, and Strome Ferry Railway, and west of the Caledonian Canal (exclusive of the islands of Skye and Mull), there are				
...	— 118
SECTION 10.—In the district enclosed by a line drawn by sea from Strome Ferry to Gairloch, thence by Loch Maree to Achnasheen, and by railway back to Strome Ferry				
...	18
SECTION 11.—In the district enclosed by a line drawn from Achnasheen to Poolewe, by sea to Ullapool, by coach road thence to Garve, and back by railway to Achna- sheen				
...	26
SECTION 12.—In the district enclosed by a line drawn from Garve to Ullapool, thence due east to Bonar Bridge, and by the railway to Dingwall and Garve				
...	14
Carry forward				58
				337

	Brought forward	...	58	337
SECTION 13.—North of Ullapool and Bonar Bridge	...		5	
Therefore north of the Dingwall and Strome Ferry				
Railway there are	—	63
SECTION 14.—In the Cairngorms, namely, in the district enclosed by a line drawn from the Spey at Loch Insh by Glen Feshie, Glen Geldie, and the Dee to Braemar, north by Loch Builg and the Avon to the Spey, and back to Loch Insh	63
SECTION 15.—In the Grampians enclosed by a line drawn by the Highland Railway from Blair Atholl to Loch Insh, thence by Glens Feshie, Geldie, and Dee to Braemar, by the carriage road to the Spital of Glenshee, and thence in a straight line to Blair Atholl	29	
SECTION 16.—In the Angus and Deeside Hills, <i>i.e.</i> , east of the road from Braemar to the Spital of Glenshee	...		30	
Therefore east of the Highland Railway there are	...		—	122
SECTION 17.—In the Islands, 15 are in Skye, and 1 is in Mull				16
				<u>538</u>

The tables require some further explanation.

In COLUMN 1, as previously stated, only such hills as may fairly be considered separate mountains, are numbered according to order of altitude.

In COLUMN 2 every distinct "*top*" is numbered in order of altitude.

COLUMN 3.—*Height*.—When not otherwise expressly stated, all the heights given are from the six-inch Ordnance Survey. Where only one height is given—as, Ben Lomond, 3,192—the six and one inch O.S. maps agree. When an exact height is followed by a height in smaller figures within parentheses, the former is from the six-inch O.S., while the latter is the contour height, which is all that is given on the one-inch map—*e.g.*, Beinn Ime, 3,318 (3,250): the true height as given on the six-inch map is 3,318, while on the one-inch map there is only a 3,250 contour. "*Ap.*," following after the height, signifies that it is only approximate; the authority in most cases being careful aneroid observations taken by Dr Heddle, Mr Colin Phillip, Mr Norman Collie, Mr Hinxman, or the writer. Where *only* a contour height is given—as, Meall a' Bhàrr (Càrn Mairg)—no figure is given on the six-inch map, and only a contour height on the one-inch.

COLUMN 4.—*Name*.—The Ordnance spelling, even to the omission or insertion of an accent, has been followed in all cases. As is well known, the spelling of these maps is very incorrect. Even in one sheet, the same word is often spelt in several different ways,—Sgùrr, Sgòrr, Sgùr, Sgòr (with and without accents), Scour, Maol, and Meall,

for instance. The names, too, in the O.S. often differ from those locally used. Wherever a name is given on the O.S. map, however, it has been retained in the tables.

A * implies that the name is taken from the six-inch map, *but is not given on the one-inch.*

A † implies that the name is locally used, but is neither given on the six nor one inch maps. In all other cases the name is to be found on both the six and one inch maps. (See note on Cuillins.)

COLUMN 5.—*Position.*—The compass-bearings and distances under this heading are not absolutely accurate, but merely approximate; and the latter are measured in a straight line on the map from point to point. They are merely intended to enable the reader at once to identify the position of a "top" on the one-inch map, and are no indication of the walking distance.

As a rule, a general description is given of the principal height of a group—e.g., Ben Lawers, Loch Tay, North side—or its position with regard to some well-known place—e.g., Beinn Laoigh, 6 m. E. from Dalmally; while minor heights are described according to their bearing and distances from the principal one—e.g., Beinn à Cliebh, 1 m. S.W. of Beinn Laoigh.

The *abbreviations*, m., for mile; N., S., E., and W., for north, south, east, and west; cont., for contour; L., for Loch; yds., for yards; in., for inch; O.S., for Ordnance Survey; and B., for Ben or Beinn, are used.

COLUMN 6.—*County.*—For the sake of convenience, Cromarty has been reckoned as Ross-shire.

COLUMN 7.—*Best ascended from.*—When the nearest hotel lies at a considerable distance from the mountain, the name of a shooting-lodge or shepherd's cottage is given first. It will be understood that in such cases accommodation cannot be counted on. The names of two hotels are often given, that nearest to the mountain being usually placed first. In a few instances, however, the hotel occupying the first place is not that nearest to the mountain; in these cases either the accommodation is better, or, though farther, the mountain is most easily ascended from that named first.

As under the heading "Position," the distances and compass-bearings, where given, are only approximate, the distances being measured in a straight line on the map; and the compass-bearings *are those of the mountain to the hotel*, not those of the hotel to the mountain—e.g., Beinn na Lap, Corrour Lodge (3½ m. N.W.), Moy (9 m. S.W.) or Roy Bridge. The shooting-lodge of Corrour is the best place whence to ascend Beinn na Lap, *which is about 3½ miles NORTH-WEST of the lodge.* Moy is the nearest inn, from which the mountain lies 9 miles S.W.; and as Moy is only a small place, Roy Bridge (Hotel) is also mentioned.

COLUMN 8.—The last column contains references to pages in the *Journal*.

The FOOT-NOTES need no explanation.

CUILLINS (SKYE).—The names of the Cuillins (so spelt in the Ordnance maps) are from Mr Pilkington's new map (see p. 235), which is more accurate than the Ordnance maps. The approximate heights of this range are from very careful aneroid observations by Mr Norman Collie.

In the SECOND TABLES the "tops" are arranged and numbered in order of altitude, only those being numbered in the *first* column which may fairly be considered separate mountains. Of these it will be seen that there are 283. In the last column the number of the section is given, and with the help of this the reader will easily find the mountain in the first tables.

Every endeavour has been made to secure accuracy and completeness. It is inevitable that there should be some mistakes, but it is hoped they will not be found very numerous. The decision as to what are to be considered distinct and separate mountains, and what may be counted as "tops," although arrived at after careful consideration, cannot be finally insisted on. I have only to add that, when first this work was commenced, I had little idea of the enormous amount of labour and research which it would entail—a labour which, even if it had not been altogether abandoned, would have been vastly increased but for the invaluable assistance given by Mr Colin Phillip, whose extraordinary topographical knowledge of Scotland has probably never been equalled.

H. T. MUNRO.

TABLE I.—THE 3,000 FEET TOPS ARRANGED ACCORDING TO DISTRICTS.

SECTION 1.

Number of Mountains in order of Altitude.	Number of Separate Top in order of Altitude.	Height. The smaller figures within parentheses are the contour height from the 1-inch O.S. Map. (2955 ft. 1-in. O.S.)	Name.	Position.	County.	Best Ascended from	See Page
179	315	3192	Ben Lomond ..	8 m. N. by E. from Rowardennan, Loch Lomond ..	Stirling	Rowardennan Inn	319

38	60	3657 ap. 7 (3500)	Beinn Ghlas,	1 m. S.W. from Ben Lawers	Do.	Do.	87, 131, 132, 168
453	453	3040 ap. 8 (3000)	Sròn dha-Murchdi,*	14 m. S.S.W. of Meall Corranach	Do.	Do.	241
63	106	3530 ap. 8 (3250)	Meall Corranach,*	2 m. N.W. do.	Do.	Do.	241
259	469	3035	Meall a' Choire Liath,	33 m. N. by E. from Killin	Do.	Do.	178
59	164	3421	Meall nan Tarmachan	1 m. S.W. Meall nan Tarmachan	Do.	Do.	178
176	176	3389 ap. 9 (3250)	Meall Garbh,*	1 m. S.W. do.	Do.	Do.	178
240	240	3265 ap. 9 (3250)	Beinn nan Eachan,*	Between Glen Lochay and Glen Lyon	Do.	Do. (64 m. N.W.)	178
92	157	3407	Meall Ghaordie	3 m. E. by S. from Stuchd an Lochain	Do.	Innerwick Inn, G. Lyon (6 m.)	
470	470	3031 (3000)	Sròn Chon a' Choirein,*	Between Glen Lyon and Loch Girtie	Do.	Do.	
191	353	3144	Stuchd an Lochain		Do.		

* Named only on the 6-inch map.

¹ The 3021 top is 160 yards N.E. of the point marked 2965 on the 1-inch map.

² The westerly top is given on the 6-inch O.S. as 3429; the easterly, —77, the two first figures being obliterated. The height is probably therefore 3477 as above, as it is only slightly higher than the westerly top.

³ and ⁴ Mr Colin Philip's aneroid measurement. ⁵ The summit is locally called Spicean nan Each.

⁶ Dr Heddle's aneroid measurement. ⁷ The writer's aneroid measurements. See p. 241.

⁸ These heights are Dr Heddle's measurements. On 21st December 1890 the writer made them somewhat higher. See p. 178.

SECTION 3—Continued.

Number of Mountains in order of Altitude.	Number of Separate Top in order of Altitude.	Height. The smaller figures within parentheses are the Contour Height from the 1-inch O.S. Map.	Name.	Position.	County.	Best Ascended from	See Page

* Named only on the 6-inch map.

† Local name, which is not given on either O.S. map.

1 Locally known as Crétise, although the point marked Sgòr Crétise on the 1-inch map is ½ mile farther N. and beyond Stob Glas Choire.

2 Mr Colin Phillips's aneroid measurement.

3 Dr Heddle's aneroid measurement.

4 Aonach Dubh a' Ghlinne (on both the 1 and 6 inch maps) is the name of the ridge of which Stob and Fhuarain is the summit.

5 Malcolm M'Killop, shepherd, Glencetein, Glenlivet, 3 miles from head of loch.

6 This mountain is named Meall Garbh on the 1-inch O.S., but as above on the 6-inch.

7 See p. 245. The north end is named An Gearanach, the south end—almost exactly the same height, and rather more than ½ mile S.—An Garbhanach. The *arête* connecting them is extremely narrow, and the height of both must be very near, if not over, 3250 feet.

8 The height marked 2424, and named Sgòr an Iubhair on the 1-inch map, is merely a bump on the ridge. The top is a small 3250 contour, nearly a mile to the N. and the same distance S. of Sgòr a' Mhain.

SECTION 5—Continued.

* Named only on the 6-inch map.
¹ Aonach an Nid, 1 mile N. of Aonach Mòr (height 3374, 6-inch map) is really only a shoulder, and not to be considered a top.
² Dr. Heddle's aneroid measurement.
³ The 3000 contour—1-inch map—is about ½ mile S. of the *sawie* Tom na Sròine on the 6-inch.
⁴ It will be seen that although on the 1-inch unnamed and only a 3750 contour given, Stob Coire Claurigh is the culminating point of the large portion of the Lochaber Hills, of which Stob Coire an Easain appears on most maps as the most prominent.
⁵ Dr. Heddle's aneroid measurement.
⁶ Height estimated by Mr. Colin Phillip.
⁷ Moy (Kingshouse), 1½ mile from foot of Loch Laggan—8 rooms with 6 beds, kept by John M'Laren. No LUGKSW. ⁸ It will be seen that although unnamed and only a 3500 contour given on the 1-inch map, Geal Chàrn is the culminating point of the large range immediately to the N. of Ben Alder.
⁹ Sgòr Iutharna is the "lancet edge" mentioned on pages 73, 138, and 245. Having stood on the top of it, and of every top in the district, I fancy it must be fully 3400 feet, and standing well out is almost worthy to be considered a separate mountain.
¹⁰ Bruach nan Iomairean (3176) is merely a shoulder of Marraonach the top of which, a short ½ mile N. by E. from Bruach nan Iomairean, is 3185 feet.

* Named on the 6-inch map.
 1 Moy (Kingshouse), 1½ mile from foot of Loch Laggan—3 rooms with 5 beds, kept by John M'Laren. No LICENSE.
 2 The summit named Creag Mhòr (3460 feet) on the 6-inch map is the very small 3500 contour, about ½ mile N. of the *same* Creag Mhòr on the 1-inch map.
 3 Mrs Grant in "Letters from the Mountains," published 1806, speaks of the whole range as "the lofty Corryardar."
 4 Mr Colin Phillip's aneroid measurement.
 5 Cron Leathad is the point marked 3441 at the N.E. end, and Creag an Lochan is the S.W. end of the large 3250 contour on the 1-inch map, commencing ½ mile to the N.E. of Creag Meaghaidh.
 6 The small 3250 contour ½ mile E. of the *same* Sron Garbh Choire on the 1-inch map.
 7 Meal an Teanga only appears on the O.S. maps as a 2750 contour.
 8 Dr Heddlie, with careful aneroid measurements, and levels from other hills, makes the height as above.
 9 The N. top of Gulvain is locally called Gulvain Mòr, the S. top Gulvain Beag.
 10 Dr Heddlie's measurements.
 11 This height is taken from the Admiralty chart, none is given on the O.S. maps.
 12 Locally the Sgùrr na Creige of the O.S. is called Bidean an Dhuinull Breac, while the top, ½ mile N. of the Saddle, is known as Sgùrr n Creige.

* Named only on the 1-inch map. † Local name, which is not given on either O.S. map.
 1 Mr Colin Phillip's measurement—levels from the Saddle.
 2 Locally the Sgùrr na Creige of the O.S. is called Bidean an Dhoill Breac, while the top, ½ mile N. of the Saddle, is known as Sgùrr na Creige.
 3 The name Maol Cheann-dearg is applied to the whole ridge—both to this top and Aonach air Chrith.
 4 The point marked 3276 on the 6-inch map is about 200 yards S.S.W. from the 3292 point.
 5 Mr Colin Phillip's aneroid measurement in very uncertain weather.
 6 The height of this top is probably nearly 3100. The only height on the 6-inch map is 3014, a little to the S. of the county march, apparently not on the top.
 7 The name Stic Beag on the 6-inch map is at least a mile N.N.E. of the 3250 contour locally known by that name.

* Named only on the 6-inch map.

† Local name, which is not given on either O.S. map.

¹ Sgùrr Mòr is the local name. On the 6-inch O.S. this top is called Sgùrr Tuagh.

² Measured by Mr Norman Collie.

³ Measured by Mr Hinxman, who made it well over 3000 feet.

⁴ The top lies W. from this point and is somewhat higher.

⁵ Dr Heddle and Mr Colin Phillip's measurements. This peak is certainly higher than Sgùrr Bàn and Sgùrr an Fhìr Duibhe.

⁶ Both on the 6 and 1 inch maps the only height given for Slioch is 3217. On the 1-inch map, however, about 200 yards E.S.E. of this point, on which is the cairn, is a small 3250 contour. Captain Kirkwood, R.E., made a note in the visitors' book at Kinlochewe, giving the height at 3260.

⁷ Only a 2750 contour is given for this mountain. Dr Heddle and Mr Colin Phillip have both, however, made the height over 3100, which is probably nearly correct.

⁸ Mr Colin Phillip's measurement. Dr Heddle made it some 30 feet less.

⁹ Dr Heddle's measurement. ¹⁰ Mr Colin Phillip's estimate.

* Named only on the 6-inch map.

1 Mr. Colin Phillip's estimate.

2 Cairnlich is the highest point of Ben Bynac. The 3296 point of the latter, marked on the 1-inch map, is merely a shoulder running up to Cairnlich.

3 It is difficult to decide what should be considered "tops" in the big plateau between Braeriach and Cairntoul.

4 Mr. Hinxman's aneroid measurement.

				Forfar	..

* Named only on the 6-inch map. † Local name, which is not given on either O.S. map.
 1 Sgoban Dubh. The south top is locally known as Sgoban Dubh Bheag, while the north top is called Sgoban Dubh Mhòr.
 2 On the 1-inch map this hill is only called "Chaorunn."
 3 The point of which the height is given is 1½ mile N. by E. of the *name* Fuar Bheinn on the maps. The Perthshire sheet gives the height 3062, but the Inverness-shire sheet 3064, while the 1-inch gives it 3064.
 4 150 yards S.S.W. of the point marked 3217 on the 1-inch O.S. is a point on the 6-inch 3224 feet.
 5 On the 1-inch map "An Socach" applies to both tops. On the 6-inch, however, "An Socach" is only the west top, while the east top is called "Socach Mòr." The name Socach Mòr on the 1-inch map is ½ mile E. of the top.
 6 In the Eastern Grampians it is especially difficult to decide what are to be considered separate mountains, tops, or merely shoulders. Little Glas Maol, Cruinn Mòr, Creag Leachdach, and Cairn of Gowl are all very doubtful tops.

SECTION 16—Continued.

183	331	3169	Ben More	I. of Mull, Argyll	I. of Mull, Argyll	Salen, Mull	

* Named only on the 6-inch map.

1 In the Eastern Grampians it is especially difficult to decide what are to be considered separate mountains, tops, or merely shoulders. Little Glas Maol, Drùim Mòr, Creag Leachdach, and Cairn of Gowal are all very doubtful tops.

² The writer's aneroid measurement.

³ Unnamed on the 1-inch O.S., but on Baddeley's and Bartholomew's maps called Cairn Taggart.

⁴ Carn a' Choire Bhoideach is on Baddeley's and Bartholomew's maps called Cairn of Corbreach. Close to the crags over Loch Dubh, just N. of the Lochnagar track from Braemar, is a point 3671 on the 6-inch O.S. The hill rises considerably to the S. of the track; careful aneroid measurements by the writer on different occasions place it about 3680 feet.

6 The writer's measurement.

⁶ The name Little Pap on the 1-inch O.S. is about half-way between the top and Cuidhe Cròm, which is the 3552 top.

7 As stated in the introduction the names of the Cullins are taken from Mr Pilkington's new map, and the approximate heights are from careful aneroid observations by Mr Norman Collie.

TABLE II.

THE 3,000 FEET TOPS ARRANGED IN ORDER OF
ALTITUDE.

No. of Separate Mountain in order of Altitude	No. of Top in order of Altitude	HEIGHT.	NAME.	Section in Table I.

[The immense extent of the labour undertaken by Mr Munro will be apparent even on the most cursory survey of his "Tables." Measured merely by time, the compilation has to my knowledge—for I have been somewhat of a task-master in the matter—occupied over three hundred hours during some five months. It may be affirmed without fear of contradiction that so complete, exhaustive, and instructive a list has never before been put together, and that it forms a contribution to Scottish orography whose value it would be difficult to exaggerate. There is little doubt that the lists will receive the study they deserve at the hands of all who are interested in the mountains of Scotland.—E.D.]
